

# Pacific Beach Water Main Replacement Water Group Job 906

## Background

The City of San Diego is working to improve the water infrastructure for residents and visitors alike. One way to accomplish this goal is through group jobs which derive this moniker because we upgrade and replace City assets simultaneously to minimize disruption to a neighborhood. We need to replace the existing Pacific Beach cast iron main as it has reached the end of its service life and perform the necessary street resurfacing.

## Project Overview

The Water Group Job 906 project consists of replacing approximately 1.84 miles of cast iron main throughout Pacific Beach generally located south of La Playa Avenue, north and west of Crown Point Drive, and north and east of Riviera Drive.

There may be temporary water outages while City crews make cuts or connections to the existing main. These outages will occur at night and each resident will promptly be notified prior to this work. To minimize the inconvenience during construction, residents along the alignment of the new main will be placed on a temporary highline service. A highline is a 2" above ground main that will service your residence while the new main is being installed. The total cost of the project is estimated at \$4.9 million.

***"Working  
together  
to engineer  
a better  
tomorrow."***

- Bikeways
- Fire stations
- Libraries
- Parks
- Police stations
- Sewer facilities
- Street Improvements
- Street lights
- Traffic signals
- Underground utilities
- Water facilities

## Construction Schedule

Commencement of the construction activities will begin in April 2011. The contractor will designate on which streets work will begin. The project is estimated to be ninety percent (90%) complete by March 2012. The entire project will be completed June 2012.
